

Behind on cancer screenings? You're not alone.

Around 69% of US adults are behind on at least one screening.^{1*}

Get screened when you feel well. Add your Galleri test benefit to recommended screenings.

The Galleri multi-cancer early detection test can detect more than 50 cancer types and can be taken annually.²

The Galleri test is available as a covered benefit to eligible associates, spouses and retirees enrolled in a Bimbo Bakeries USA medical plan who are age 50 and older or 40-49 with certain risk factors.

*The cancer screenings studied in this survey were for breast, cervical, colorectal, lung, oral, prostate, skin, and testicular cancer.

The Galleri test does not detect a signal for all cancers and not all cancers can be detected in the blood. False positive and false negative results do occur. Galleri is a screening test and does not diagnose cancer. Diagnostic testing is needed to confirm cancer. The Galleri test should be used in addition to healthcare provider recommended screening tests. **Rx only.**
